THE ORCHID GLADIOLUS
(A NEW TYPE)

RANCHO SANTA FE BULB CO.
RANCHO SANTA FE
SAN DIEGO COUNTY, CALIFORNIA

The Orchid Gladiolus

This is a seedling originated by our Mr. A. R. Sprague, and has been tested over a period of six years and remains true to type.

Blossoms from bulbs one inch and over, range in natural spread of petals from four to six inches, with four to five flowers open at one time. It has a wiry stem and holds up well as a cut flower.

The flower is so different from the usual type of Gladiolus that a floret worn upon a lady's dress would generally be mistaken for a Cattleya Orchid.

At the California Gladiolus Association Exhibition, 1927, a special award was given this flower as "A NEW and beautiful TYPE of Gladiolus" for it resembled no other variety in the show and was distinctly the novelty of the Exhibit.

A Florist who paid \$100.00 for a bulb three years ago, writes: "It is absolutely a new and very beautiful type and extremely well adapted to Florist work. While it will not stand extreme sun heat, if cut when the first floret is opening it opens out most beautifully and stands the heat of Exhibition Hall remarkably well. A basket of it always draws a crowd."

A new type or species is seldom developed in any flower and in Gladioli there are very few, hence the "ORCHID" is a most important addition to this most popular flower.

As it is a new form of gladiolus there is no class for it, but Chas. E. F. Gusdorf writes that if scored as a grandiflorus it rates 92% by A. G. S. scale. Extremely few reach this mark.

Single bulbs \$1.00 each or \$10.00 per dozen.
Write for rates per 100 and 1000.

The following varieties we know to be among the very best and we have no hesitation in offering them to discriminating flower lovers.

Giant White

Like a beautiful lily. A strong grower.

Each 15c.

Per Dozen \$1.00.

Mrs. C. F. Pease. This seedling first bloomed in 1926. It is a most charming flower, of medium size and height, exquisite in bud, opens wide, with outer petals slightly ruffled. Color of three inner petals is clear apple blossom pink, and outer ones very bright Padre rose, shading darker at tip. The two lower petals each have a lovely bright Tyrian purple feather. The stem is slender and wiry. All flowers face one way and are nicely

Glendale

A beautiful dark magenta, an entirely new shade in gladioli. Wide open flowers on a tall straight spike. This variety drew much attention at our exhibits this year.

Each 10c.

Per Dozen \$1.00.

THE PETITES

We have developed a very small, dainty type of gladiolus, for uses which the larger varieties do not serve, and very greatly better than the Baby Glads, or Colvillii.

These we have in pink, white, rich vermilion and buttercup yellow, clear self colors except "Exquisite," which combines two shades of pink. We have a very small stock of these as yet, but we will release a few of the first one developed—"Exquisite," at \$25.00 per bulb. This was shown for the first time at the "Biltmore Show," Los Angeles, 1928, and was very greatly admired.

Capt. Scarlet. This is the brightest yet developed, and this is saying something, for no one denies the brilliancy of Virginia and Dr. Bennett. Capt. Scarlet is a large open flower, clear self color, except a very lovely cream blotch which greatly adds to its beauty. Each, \$10.00

Prices and Terms

Prices quoted in this list are postpaid delivered, on orders in excess of \$2.50; smaller orders postage extra. Cash with order.

Remittances should be made by check or post-office money order.

Prices per 100 or per 1,000 bulbs will be quoted on application.

We are prepared to supply planting stock to the trade.

We will replace any bulbs which are not satisfactory upon delivery, upon their return to us. However, The Rancho Santa Fe Bulb Co. gives no warranty, express or implied, as to description, quality, productiveness, or any other matter, of seeds, bulbs, or plants they send out, and they will not be responsible in any way for the crop. If the customer does not accept the goods on these terms they are at once to be returned.

We have a choice collection of seedlings which have been twice selected. Every one is a very desirable flower and distinctive. As we cannot afford to advertise so many new varieties, we have decided to sell them at a very low figure—\$10.00 per 100. As we will put in an Orchid gladiolus with each order of not less than \$5.00, order early as the number is very limited.

THE ORCHID GLADIOLUS AGAIN

The dainty beauty of this remarkable flower is but poorly shown by the half tone cut.

The color is so exactly what such a shape should have that, while we have, by crossing this, developed several other colors with the same shape, they are not so beautiful as this. However, they are an interesting family and will be offered in two or three years.

We believe that many millions of the Orchid Gladiolus will be required to meet florists' needs when once they can be had at florists' prices.
